About the Summit

Held annually since 2020, the Australia-Israel Innovation Summit is a highly anticipated event on the Australia-Israel Chamber of Commerce (AICC) calendar.

With the AICC's reputation for bringing the latest insights and developments on disruptive innovation from Israel to create opportunities for Australia, the Summit is a knowledge exchange that is essential to business, government and community leaders wanting to understand and prepare for the future.

The content-rich afternoon program brings together high-level business experts and thought leaders from Australia and Israel who are solving global challenges via out-of-the-box thinking and solutions to deliver global competitiveness.

Each year a theme is selected to reflect the pressing questions faced by most industry sectors. Presenters share collective insights and explore key issues critical to business success around this theme. These are not-to-be-missed conversations vital for your business to embrace disruption and build commercial resilience.

About the Showcase

The Israel Innovation Showcase is an integral part of the Summit. It provides an opportunity for all participants to meet with innovative businesses and disruptors across multiple sectors who are bringing Israel's know-how to Australia.

Connect and build valuable new relationships during the Summit networking lunch and afternoon tea that take place at the Israel Innovation Showcase.

Information and contact details for these businesses can also be found on the Summit website Showcase pages.

Wednesday 19 October 2022

	Program Overview
2.30 - 2.45pm	**Opening and Welcome** **Jillian Segal AO,** Corporate Leader and Chair, Australia-Israel Chamber of Commerce (NSW) **The Hon. Anthony Albanese,** Prime Minister of Australia **His Excellency Isaac Herzog,** President of the State of Israel
2.45 - 3.00pm	**Building Israel's "Iron Dome" in Cyber Space - Protecting Business and Community** To meet increased cyber attacks head on, and taking lessons from its experience in defence design, Israel is now undertaking an 'Iron Dome' approach to protecting critical infrastructure assets. Israel's Minister for Communications discusses how a whole of government approach is being taken to raise cyber security standards. **Dr Yoaz Hendel,** Israel's Minister of Communications
3.00 - 4.00pm	**Panel Session: The World in Transition - New Technologies to meet Climate Change** Technological advances, and innovative thinking, offer the solutions to accelerate our trajectory towards a green future. 'Climate-Tech' will be key to delivering better outcomes across sectors for solutions to kick the carbon habit. This opening panel discussion examines the challenges for industry to achieve sustainability objectives and deliver real progress, including how organisation technology can address climate change and gain economic value; what is needed to build a climate tech ecosystem, the role of global and collaborative partnerships; and why capital investment is needed to supporting innovative solutions. **Professor Bronwyn Fox,** Chief Scientist, CSIRO **Jonathan Medved,** Founder and Chief Executive Officer, OurCrowd **Karolina Szukalska,** General Manager - Workforce and Innovation, Minerals Council of Australia **Uriel Klar,** Director, PLANETech Moderator: **James Riley**, Editor, InnovationAus

Concurrent Panel Session

Hall 1

The Financial Services Sector Crossroads - Decentralised Finance, Crypto and Risk

The decentralisation of financial services and the meteoric rise of cryptocurrency is at a critical crossroads. Cryptocurrency is changing the rules of one of the oldest professions, presenting threats to incumbents and posing questions about the future of financial systems. As new capital platforms flood the market, innovation is changing how companies and people access financing.

How are traditional financial markets impacted by efforts to create new international financial systems? What is the role of stable coins and how do they fit with the metaverse and digitalised autonomous organisations? Where does crypto investing and traditional finance intersect in the development of 'smart contracts'? And how do both private and institutional play a role in digital assets becoming mainstream?

Michael Shaulov, Chief Executive Officer, Fireblocks**,**
Ryan McCall, Chief Executive Officer, Zerocap
Joni Pirovich, Principal, Blockchain & Digital Assets
Professor Yehuda Lindell, Cryptographer, Coinbase and Former Chief Executive Officer & Co-Founder, Unbound Security
Moderator: **Jessica, Iacobucci**, Head of Trade & Supply Chain Sales Australia & PNG, ANZ

Concurrent Panel Session

Hall 2

The Health Revolution - Digital Transformation at Pace

Witnessing accelerated demand driven by Covid 19, digital healthcare is transforming all stages of patient care, and in some cases making what was impossible, possible. Israel's healthcare system is one of the most digitised in the world, and its world-renowned healthcare innovation ecosystem includes more than 700 digital health start-ups. This panel of Israeli and Australian experts will discuss what lies ahead as well as opportunities for cooperation in this innovative field which, with the help of these next-gen technologies is pushing care beyond its traditional confines, improving outcomes, reducing costs and transforming the patient experience.

Wednesday 19 October 2022

	Dr Galia Barkai, Director, Sheba BEYOND, the first virtual hospital at Sheba Tel HaShomer City of Health **Graeme Loy,** Chief Executive, Western Sydney Local Health District **Richard Taggart,** Executive Director Digital Health & Innovation, Sydney Local Health District **Dr Yossi Bahagon,** Special Expert Advisor World Health Organisation; Founding Managing Partner, Qure Ventures; Chairman, Sweetch Moderator: **Caitlin Francis**, Partner and Health Specialist, EY
5.00 - 6.00pm Microsoft *PLATINUM SPONSOR* ***Concurrent Panel Session*** **Hall 1**	**Cyber Security - Risks and Response** Against a backdrop of factors such as consumers demand for digital products, employee demands for flexible working conditions, and situational challenges such as the pandemic, information technology and the implementation of technology is rapidly evolving. Moreover, as the majority of businesses become more reliant on IT, the question becomes, have organisations considered the new business risks that this advancement brings? This panel will examine how the cyber risk landscape has changed and what this means for businesses and business leaders. The panel will also consider how the way in which businesses and organisations need to change their approaches to responding to cyber risk and incidents. **Katherine Mansted,** Director of Cyber Intelligence and Public Policy at CyberCX; Senior Fellow, Australian National University's National Security College **Reut Menashe,** Founder and Chief Executive Officer, Tetrisponse; Co-Founder Leading Cyber Ladies **Dr Tomer Simon,** Chief Scientist of Microsoft Israel R&D, Microsoft Israel **Will Luker,** Chief Information Security Officer, Department of Premier and Cabinet, Government of South Australia Moderator: **Mark Anderson**, National Chief Security Officer, Microsoft ANZ

Digitising Supply Chains in a Services-driven Economy
Both industry and government know that a holistic supply chain digital strategy is key to future success.
As a services driven economy, businesses and government need technology to lead the redesign of many of Australia's supply chains. Artificial intelligence, robotics and automation will become more important to supply chain planners as Australia comes to rethink traditional ways of doing business and prioritise system-wide optimisation, and are key to building resilience, engaging with global trade, growing our domestic industries, underpinning jobs, and sustaining our way of life.

Advances in technology are allowing supply chains to think for themselves, by combining internal data with external sources such as weather, IoT sensors, press reports and social media to create a corpus of information for decision making.Technology also lower costs, optimises processes and creates predictive analytics.
